Increase customer confidence from the sales floor.

Customers want confidence that the furniture they wish to buy will fit in their home. Icovia Tablet Edition allows your sales associates to quickly prove the fit and remove the concern for the customer.

Add Icovia Tablet Edition to your business to reduce no-fits and returns, increase average order size, and engage the customer during the decision-making process.

Share designs to and from your website room planner.

Icovia Tablet Edition is fully integrated with your existing room planner. Customer designs created at home can be captured and used to complete the sale on the sales floor.

Engage mobile customers with tablet based room planning.

Increasingly customers are shopping for furniture from mobile devices and retailers are enabling their websites to accommodate.

Icovia Tablet Edition empowers you to mobile enable room planning from a tablet like no other industry room planner!

Extend your brand with your own App.

Add credibility and extend your brand by providing your customers with your own App available from you on the AppStore.

Soon available for every Tablet OS.

"Icovia's new Tablet Edition room planner is just what furniture retailers need right now to improve the selling process... This iPad companion to their successful web-based product is well thought out and easy to use. It's the core room planning functions retailers need to confirm furniture will fit, speeds up the sales process and helps the customer visualize how their room will be merchandised. This latest introduction from Icovia will help any retailer, from the Nation's leader like Ashley HomeStores, to the smallest local Mom & Pop."

-John Disa. President

"It was fun and easy to use and helped me develop the room of my dreams in the palm of my hands."

-Icovia Tablet Edition BETA User

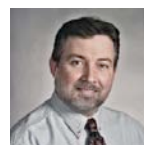

"Icovia Tablet Edition not only empowers our Living Spaces sales team with an in-store sales tool, it also mobile enables our room planner for consumers on iPads. Of course it goes without saying that we're thrilled to work with Icovia to introduce the first company branded furniture retail room planner for the iPad."

-Larry L. Smith. Chief Technology Officer

"The simple way to design your room."
